

## LITTLE ITEMS OF LOCAL INTEREST

Mrs. McDow and daughter Sheila arrived in Carbon on Wednesday evening from a couple of months' visit with relatives in Scotland.

Born, on September 5th to Mr. and Mrs. P.H. Steele of Carbon, a son.

Rev. and Mrs. McDonald and family and Norman Crimmon were visitors to Dr. H. H. H. and family the day with the Gillette family.

Mrs. W.B. Elliott left Thursday for a visit at her home in Clarendon.

Mr. and Mrs. H.T. Sobey and family spent Tuesday in Calgary.

Cornie Friesen has taken a position as driver for Red Bus Lines Limited and left Monday for Drumheller to commence work.

Two weeks ago Mr. Ross D. Jop reported that he was the proud father of a son and he is now a week old. This item was inadvertently omitted from our news columns last week.

Miss Joyce Laing will attend the Crescent Heights High school in Calgary this year, where she will finish her Grade 12.

On Friday last Mr. and Mrs. Brownjohn, Mr. and Mrs. Addison and Miss Trowen of Calgary visited at the home of Mr. and Mrs. R.R. Thornburn. Mr. Brownjohn is an old timer of the Carbon district, coming here in 1900. He built the first store in Drumheller in 1910 and later moved to Vancouver, where he lived with his family for a number of years. Mrs. Brownjohn with her parents were among the early settlers in the Bonanza district.

### AUCTION SALE, SEPT. 21

An auction sale will be held at the farm of the late John Burke, four miles east of Carbon, on Thursday, September 21, commencing at 1 p.m. Stock and machinery comprise the main items at the sale. See posters for further particulars. S. N. Wright will be the auctioneer.

### RAIN DELAYS HARVESTING

Light rain set in on Sunday and continued Monday, putting a stop to all harvesting operations in the district. The bulk of the cutting has now been done and farmers started last week on the hauled crops, when some excellent yields are expected in spite of the 100 per cent hail damage on July 1st.

### TEACHING THE WIFE TO DRIVE

Now we're all set. Just turn the finger over and push on the kicky with your left hand and pull down on that other little liner with your right, then press down the do-dawny with your left foot and yank the umpty-diddy, then let up on the foot dings and put your other foot on the other yadoodle; and don't forget to push down on the hood-noddy, every time you move the whatsumyaccallit, and you'll be hunky-dorey, see?"—Kamrooz Sentinel.

## FRANCIS POKON TAKES BOTH OPEN AND DISTRICT SINGLES AT DRUMHELLER

### Defeats Bruce Sangster In Finals of Both Events

Francis Pokon of Carbon won both the Men's Open Singles and the Men's District Singles in the postponed finals of the Drumheller Lawn Tennis tournament which was completed on September 10th.

In the Men's Open Singles final he defeated Bruce Sangster, Calgary, 2-6, 6-3, 6-4, and in the District Men's Singles he again defeated Bruce Sangster, 4-6, 7-5, 7.

The Open Men's Singles has a very handsome Challenge Cup, the Dewar Cup, which F. Pokon will hold for one year in addition to the other cups which will be his permanent property. F. Pokon with Miss A. Lemay for partner also reached the final of the Mixed Open Doubles but lost to S. Jamison and Miss Lannon of Drumheller. With Miss M. Nash as partner Pokon lost in the quarter-finals of the District Mixed Doubles, losing to Jamison and Miss Lannon in this also. During the entire tournament, Francis played twenty matches, only losing two, the Mixed Doubles final.

### PARENTS MEET WITH SCHOOL INSPECTOR W.E. FRAME

Parents of children of Room 3 of the Carbon school met last Friday afternoon with members of the Carbon School Board and School Inspector W. E. Frame to place their grievances in a further endeavor to have the contract of the present teacher cancelled. All complaints were received in writing and will be forwarded to the Department by the School Inspector and if any action is taken the School Board is to be notified.

Last year Room three of the Carbon school had an enrolment of 35 pupils, according to school records.

### "Chuck" Gordon will attend the Old School of Agriculture this fall.

September 13, 1928

The trees planted by the Carbon Elks this spring in front of the school have grown well and attained quite a size for a season's growth.

Born to Mr. and Mrs. Chas. Pattison on Saturday, September 1, a son.

Lawrence Pokon has purchased a Chevrolet truck from R.J. Garrett.

A hard frost last Friday turned the gardens black and will damage some of the grain still to be cut.

Walter Mancel has a new Chrysler car.

### WHEAT CROP RATING HIGH

The following appeared recently in the Family Herald and Weekly Star: "There will be no shortage of good farmers for many years to come with a 40-mile radius of Drumheller, if progress continues as found this year. The sons are out-clasping the fathers who pioneered this area."

The Open Drumheller Junior Wheat Club plots at Munson, Ghost, Pine Creek, Drumheller and Orkney were judged by district Agriculturist A.J. Charnick, who said he had never seen such fine farming in his life. Two boys were given 90 per cent, while another got 84.4. The wheat in the two winning plots stands over five feet high, and will be between 50 and 60 bushels to the acre.

## PRICE FLUCTUATIONS OF WHEAT DURING LAST WAR

During the month of August the price of wheat for 1 Northern in store at Fort William was 7.8 cents, and at Liverpool Canadian wheat increased in price 5 and 7.8 cents, yet at the same time the price of wheat in the German Reich exists and has existed in our Dominion of Canada as well as in the tenth day of September, 1939. Now here we do hereby declare that the German Reich exists and has existed in our Dominion of Canada as well as in the tenth day of September, 1939.

Of all which our loving subjects and all others whom they present, we hereby request that they take notice and to govern themselves accordingly. In testimony whereof we have caused these letters to be made patent and the great seal of Canada to be hereunto affixed. Witness: Our Right Honourable Lord Edward, Earl of Liverpool, Governor-General and Commander-in-Chief of our Dominion of Canada, at Ottawa, this 10th day of September, in the year of our Lord one thousand nine hundred and thirty-nine and in the third year of our reign.

### W. L. MACKENZIE KING, Prime Minister of Canada.

## THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

Crop Testing Plant meetings, recently held at 14 different points over the Prairies, reveal that farmers are eagerly seeking advice about the variety of wheat to use.

"Should we grow Thatcher, Brown, Apex or Regent," they ask, "and are these rust-resistant stocks suitable for Alberta?"

The advice given by the plant breeders was: "Use only a rust-resistant variety in the rust areas of Manitoba and Saskatchewan. Any one of these varieties, either Thatcher, Brown, Apex or Regent will be found satisfactory. Naturally one of these varieties will eventually be found to be more suitable than the others in certain districts, but it will take several years of further testing by farmers themselves before this can accurately be determined."

In Alberta and parts of Western Saskatchewan, ordinarily out of the rust area, a farmer would have to use his own discretion, the authorities thought, but the farmer would be wise to consult his Provincial Department of Agriculture or with his University agent.

One other piece of advice was given. If a farmer decides to use a rust-resistant variety he should certainly purchase some new seed each year for the reason that each year these new varieties are being improved by plant breeders and show growers.

The Choir of the United Church had a party at the home of the L.O.R.E. Club rooms for four members who left this week to attend school in other centres. The honored guests were the Rev. Elaine Torrance and Inez Sobey, and Francis Pokon and Chuck Gordon.

Mrs. George Wilson, L.T.C.M. Teacher of Piano and Theory. Pupils Prepared for Examination in Toronto Conservatory of Music and L.R.S.M.

## PROCLAMATION OF WAR ISSUED BY PARLIAMENT

Following is the text of the Royal proclamation issued Sunday declaring Canada at war with Germany: Tweedsmuir (L.S.) Canada. George the Sixth by the Grace of God, of Great Britain, Ireland and the British dominions beyond the seas, King, Defender of the Faith, Emperor of India.

To all to whom these presents shall come or whom the same may in any way come.

Greeting. A Proclamation. Ernest Lapointe Attorney-General, Canada: Whereas by and with the advice of our Privy Council for Canada we have signified our approval of the issue of a proclamation in the Canada Gazette declaring that a state of war with the German Reich exists and has existed in our Dominion of Canada as well as in the tenth day of September, 1939. Now here we do hereby declare that the German Reich exists and has existed in our Dominion of Canada as well as in the tenth day of September, 1939.

Of all which our loving subjects and all others whom they present, we hereby request that they take notice and to govern themselves accordingly. In testimony whereof we have caused these letters to be made patent and the great seal of Canada to be hereunto affixed. Witness: Our Right Honourable Lord Edward, Earl of Liverpool, Governor-General and Commander-in-Chief of our Dominion of Canada, at Ottawa, this 10th day of September, in the year of our Lord one thousand nine hundred and thirty-nine and in the third year of our reign.

### W. L. MACKENZIE KING, Prime Minister of Canada.

## LADY ROBERTS L.O.E. MEET AT HOME OF MRS. C. FRIESEN

The Lady Roberts Chapter L.O.E. met at the home of Mrs. C. Friesen, Monday evening, Miss Chaplain being the hostess. Contests were held and were won by Miss Grace Cameron and Miss Caroline Wright. On behalf of the Chapter Mrs. C. Oliphant made the presentation of a souvenir sword to Miss Inez Sobey, who has left to attend Normal in Calgary.

## BANK OF MONTREAL REGULAR CROP REPORT

General—Good progress has been made with the harvesting of the grain crops of the Prairie Provinces, although wet weather has caused delays in Manitoba and in parts of Saskatchewan. Thrashing is well advanced in Manitoba and is general in Saskatchewan. In southern Alberta and the Peace River District thrashing is under way but elsewhere in the Province little has been done. While wheat yields are extremely variable, outputs in most districts are higher than expected and the grain is reported to be of good quality. Good average yields are being obtained in Manitoba and Alberta. Wheat and drought caused considerable damage in Saskatchewan, but except in the southern district, where crops are practically a failure, wheat yields generally will be fairly satisfactory. In Quebec Province crops are maturing rapidly under good weather conditions and prospects are favorable for heavy yields in all the main staples. In Ontario grain, hay and root crops are satisfactory. Peaches, grapes and late apples abundant. Tomatoes a good crop and the tobacco crop of average weight and quality.

In the Maritime Provinces crop prospects have become less favourable during the past two weeks owing to continued lack of moisture. The average crop of grains is indicated, but roots and potatoes have suffered a setback. Good quality of the crops of apples still promises to be at least equal to average. In British Columbia grain crops are slightly below average, there is an excellent crop of hops, late potatoes and roots are doing well and all tree fruits are plentiful and of good quality.

Alberta—About 75 per cent of the wheat crop has been cut under favorable weather conditions; early thrashing returns indicate higher yields than anticipated, with grain one to three northern predominating. Cutting of a light crop of coarse grains is well advanced. Potatoes are drying up but no shortage of winter feed is anticipated. Sugar beets are satisfactory.

Miss Joyce Laing entertained at a miscellaneous shower at the home of Mr. and Mrs. R.R. Thornburn on Saturday afternoon in honor of Mrs. Van Doun (nee Lettie Pierson). Mrs. Jas. Smith and Mrs. Fred Fuller were the hosts and in conclusion Miss Laing served a dainty lunch to her guests.

Miss Alice Casper of Edmonton arrived last week and is visiting with her aunt, Mrs. H.M. McCumby.

### A Worthy Cause

The stirring appeal which has been sounded during the past few months for financial support to ensure continued maintenance of Jack Miner's bird sanctuary in Eastern Canada should strike a responsive chord in the breast of every lover of wild life and of every true sportsman on the entire continent.

When it is remembered that Jack Miner, at great personal sacrifice to himself and family, has done pioneer work in bird banding for a long period of years resulting in valuable information which has made conservation of game birds on present day scale possible, it is not too much to suggest that his work is deserving of recognition in a practical way, at least to the extent that will enable the work to be carried on. It would not be going too far ahead to state that every sportsman in the United States and Canada owes him a debt beyond calculation.

The banding of ducks and geese by Jack Miner, and in later years by the Biological Survey of Washington, has resulted that there are three migration routes which the birds follow in their annual flights to and from their breeding grounds. One route lies east of the Mississippi, another west of the Mississippi to the Rocky Mountains and the third is along the Pacific Coast, west of the Rockies.

The ducks and geese banded by Jack Miner at Kingville, Ontario, which is centrally located along the Great Lakes, are practically all reported shot east of the Mississippi with the exception of the odd bird which has strayed across to the western side of that big river.

It has been Jack Miner's sanctuary and his activities at Kingville that have saved a breeding supply for hunters and especially those who enjoy their sport in Southern Illinois and the junction of the Illinois and Mississippi rivers and eastward through to Carleton Place, Lake Mattamuskeet and other winter quarters.

#### Benefited Greatly

The band records compiled by Jack Miner over a long period of years prove that the sportsmen along the Atlantic Coast and in the Eastern United States benefit very little from the activities of the duck and goose population of Western Canada.

The great value of the Jack Miner bird banding activities is that it has given the people of the United States and Canada indisputable record of the number and percentage of ducks and geese cared for by the famous Canadian bird sanctuary at Kingville that are shot in the United States.

Jack Miner, as well as many other leading Canadian sportsmen, conservationists and public spirited citizens, feels that the sportsmen of the United States should, without hesitancy support him in a tangible way by raising sufficient funds to enable him to maintain his establishment and carry on his work.

At the present time hundreds of thousands of dollars are being spent in Western Canada by Ducks Unlimited, money which is raised in the United States to restore former breeding grounds and establish new ones in Western Canada to raise ducks for the American sportsman to shoot. If it is possible to raise such large sum among the hunters of the United States for this new project, there should be a few thousand dollars available to assist Jack Miner whose activities have spelled success for nearly half a century.

In the winter of 1928 about Jack Miner had a breeding population of between 25,000 and 30,000 Canada geese for three months in the spring and three months in the fall, that were all fed by him and given a new lease from the hunter's gun.

Last winter a flock of Canada geese numbered between 5,000 and 10,000 never entered the United States, remaining at the Kingville sanctuary all winter. The increase from this flock alone will give the sportsmen in the United States the real opportunity to shoot an additional 10,000 to 25,000 geese.

#### Miner's Fortune Told

With these facts in mind an appeal to American sportsmen to maintain the Jack Miner sanctuary should not fail on deaf ears.

The result of close contact with Jack Miner and his work over a period of many years contributes can be assured that any assistance which can be given will not only be gladly accepted but will be expended to the greatest possible advantage. Jack Miner himself has spent his entire personal fortune on this work and has contributed his own time and that of his family to the great cause.

In a recent announcement it was pointed out that cheques should be made payable personally to Jack Miner, Kingville, Ontario, and it was stated that to those who wish to secure a statement of actual financial conditions before large amounts are contributed, a sworn statement of the bank handling the account at Kingville will be mailed.

#### Novel Tree Garden

A garden of trees, to be planted with sprouts from such famous trees as the one from which the apple fell on the Isle of Newton, awakening him to the law of gravity, is planned in England by Lord Jersey.

Caterpillars breathe through "portholes" along their sides.

There are more than 115,000,000 sheep in Australia.

#### Quality Is Impaired

Story From Switzerland Confirms Report About German War Weapons

Switzerland produces most of her own guns, and it is reported that her anti-tank infantry gun is one of the most effective pieces of defensive machinery yet produced. Swiss papers reported an amusing incident recently which seems to confirm the report that Germany's search for material has seriously impaired the quality of her manufactures.

Not long ago to go the tale, the Swiss Army wished to place an order for a number of German tanks and several tanks were brought to Switzerland for demonstration. The German tank crews were so sure of their wares that they offered to remain in their machines during the trials, but the Swiss officers refused. When the tests were over the tanks were literally torn apart, to the relief of the German officers who had so narrowly escaped with their lives.—New York Post.

#### Improve Farm Land

165 Million Acres In West To Benefit By Rehabilitation Work

The area coming under the provisions of the Prairie Farm Rehabilitation Act covers approximately 165 million acres of land in the Provinces of Manitoba, Saskatchewan and Alberta. Within this area there are approximately 47,000,000 acres of improved farm land, representing about 55 per cent of the total improved acreage of farm land in Canada. In addition the area constitutes the most important single agricultural district in the Dominion and one of the major regions of the world for the production of wheat and other cereal crops.

##### FRUIT FILLED BREAKFAST

100

2½ cups sliced Strawberries, Dried

4 cups Flour

2½ cups Creamed Baking Powder

1 teaspoon salt

4 tablespoons sugar

5 tablespoons butter or other shortening

1 egg, slightly beaten

7 tablespoons milk

Melted butter

1½ cups brown sugar, firmly packed

1 teaspoon cumin

1 cup chopped walnut meats

1½ cups seedless raisins

1 teaspoon grated orange rind

8½ cups flour, measure, add baking powder, salt, and sugar, and sift again. Cut in shortening. Combine egg and milk; add all at once to flour mixture and stir until all lumps are dampened. Then stir vigorously until mixture forms a soft dough and knead 20 seconds. Roll into oblong sheet, 1½ inch thick; brush with melted butter and sprinkle with mixture of brown sugar, cinnamon, nuts, raisins, and orange rind. Roll up for roll; using edges together to form ring and place on ungreased baking sheet. With scissors, cut 1-inch slices, almost through ring, leaving ends joined. Bake in hot oven (400 degrees F.) 25 minutes or until done. Remove to cake rack and while hot spread with glaze made by combining 1 cup sifted confectioners' sugar and two tablespoons milk (about 1). Serve warm or cold.

#### Not So Very Good

Story About Herr Goebbels and Schoenboer Worth Repeating

Goebbels was paying a visit to a public school in order to see how his propaganda was affecting the youth of the country. He asked a small boy to quote from memory some patriotic greeting. The child replied: "Heil Hitler." "Quite right," said Herr Goebbels, "but there are other slogans. A second boy piped up: "Deutschland über Alles."

"Fine, fine," said Goebbels, "but there are even more impressive ones." Whereupon the smallest boy in the class contributed: "Our people shall go on for ever." "Bravo," said Goebbels, "that's very good indeed! What's your name?" And the boy answered: "Imme Levy."—Nebelapfel, Borsbach.

Pittsburgh Editor Advertises His Private Pullman For Sale

In the Pittsburgh Post-Gazette appeared the following advertisement:—PRIVATE PULLMAN CAR FOR SALE

There are four sleeping rooms, a large dining room, a bathroom, a large lounge.

It has many other conveniences like shower bath, radio and telephones.

The original cost of this car was just under \$100,000. Will sell for one-third of this sum if quick sale can be made.

The owner, Post-Gazette Publisher Paul Block, once publisher of seven papers, now of four.—Time.

#### Are Rigidly Protected

No Kuala Bear Skins Are Being Exported From Australia

The Australian Press Union says publicly given in the United States to Australia's favorite native bear, the koala, caused a demand for coats made from their skins and this led to reports that koalas were being illegally killed here and their skins exported.

The Chief Secretary (Mr. Bailey) cannot require to be made and then revealed that the skins being used were exported in 1927 when, during the open season in Queensland, 600 were obtained by trappers. Since then the koala has been rigidly protected.

#### On The Right Side

Austrian Baron Farming In Canada Would Fight With Britain

Canada welcomes the newcomers and particularly when they are like an Austrian baron, who fought for Germany in the Great War, but, arriving in Canada to take up farming, says "I will fight for the English people in this war, if it comes. I will fight for Great Britain because I know I will be fighting on the side which stands for the rights of people; I shall be on the right side. He looks as if he will be a desirable asset.—Buckley Recorder and Times.

Soft ivory does not split easily and is therefore, more easily worked to intricate designs and patterns than is hard ivory.

The young of the condor cannot fly for 12 months after being hatched.

# Canada's Forests Supply Materials For One-Third Of Our Manufacturing Plants

Canada's forests occupy about 753 million acres, or more than one-third the total land area of the Dominion, according to the Department of Mines and Technical Surveys. More than half of the forest area—492 million acres—is capable of producing timber of commercial value. The remainder of the forests, situated on sub-alpine, sub-arctic, and other less favourable sites, are of value for their influence on climatic conditions, the control of stream flow and water supply, the protection of wild life, and as sources of wood supplies for the local needs of the native and white population.

The total amount of timber of merchantable size in Canada's forests is estimated at 273,653 million cubic feet, of which 170,144 million cubic feet is considered accessible by means of the present transportation facilities. This accessible and merchantable timber includes 245,313 million feet board measure of wood suitable for the manufacture of sawn lumber and 1,107 million cords which may be utilized as pulpwood, fuel-wood, and mining timber. The softwoods, which are in the greatest demand for construction and the manufacture of pulp and paper, comprise about 80 per cent. of the total accessible and about the same proportion of the annual cut.

Canada's forests supply raw material to about one-third of the Dominion's manufacturing plants. These industries provide employment for about one out of every four persons engaged in the manufacturing industries and pay about one-quarter of the wages. The forest industries, including the manufacture of sawn lumber, pulp and paper, and other wood products, employ approximately 175,000 people, but owing to the seasonal nature of the work, especially in the logging and lumber branches, it is estimated that at least 350,000 workers receive a substantial amount of employment in the forest industries.

During recent years the use of Canada's forests for recreation has reached noteworthy importance. Abounding in lakes and streams, which in addition to their beauty offered excellent fishing and boating lands are attracting increasing numbers of holiday seekers, not only from the urban centres of Canada but from the United States and other countries. National and provincial parks, where special facilities are provided for recreation of this nature, are among Canada's outstanding tourist attractions, but for those who prefer the more rugged and adventurous life in the woods there are hundreds of thousands of square miles of forest where the silence and solitude are broken by the sound of rushing water or the call of some wild creature.

## Knew Charles Dickens

Englishman Baked Bread And Brewed Beer For Novels

Ninety-five-year-old Mrs. Mary Ann Fooks, of Robin Hood Lane, Walsden, Chatham, who had an intimate knowledge of Charles Dickens, has died in the County Hospital, Chatham, England.

When a girl, Mrs. Fooks was a maid at Great Oakley, the Highgate home of Mr. George Lake, where Dickens visited when he came to the farm, she once said, "he always wanted home-baked bread, home-brewed beer, and he always asked for 'his' food." It was Mrs. Fooks who helped to make the bread and brew the beer.

After 80 years, she remembered well his heaver hat and the short tails of the coat he used to wear to Highgate. She remembered, too, that "he always looked as if he needed a hair cut."

## Proof Enough

When Colonel Beck was over here in London, says the National Review, Mr. Chamberlain cross-examined him on the strength of his air defences. "Were their anti-aircraft guns good?" Colonel Beck, apparently a little puzzled, said he thought they were. "Ah, but are you sure?" said Mr. Chamberlain. "Well," said Colonel Beck, "they ought to be. We have sold you most of our guns during the past few months."

Polar explorers are able to obtain fresh water by melting ice that has been formed on salty sea water. This has been an important factor in saving lives of numerous explorers stranded on ice floes.

## Turner Valley Oil

Expert Believes Structure Extends To 25 Miles

Dr. G. S. Hume, chief of the Federal Geological Survey, expressed belief that Turner Valley's oil structure, extending approximately 20 miles in a south-to-north direction.

In delivering a paper on Turner Valley geology to the 21st annual western meeting of the Canadian Institute of Mining and Metallurgy, Dr. Hume said he believed the structure was 25 miles in length. It was 18 miles in the north, the valley structure probably continued seven miles south of Home-Millerville. No. 2 well, to section 22 and 2032 Creek, he added.

The Home well is about 18 miles north of the south Turner Valley producing area.

Dr. Hume, however, made it clear that he was not stating that the limestone would be productive as far north as section 22 but he said the structure would extend that far. The width of the field at the north end would be considerably narrower than in the south end.

Until it was known definitely whether there was oil in the upper porous limestone at Okla 6, deep wells in the Turner Valley and section 22 would be considerably narrower than in the south end.

Both Okla 6 and Scottish Petroleum had been in the oil business for some time and were now in progress to determine whether oil production can be obtained.

## Famous Bad Lands

Dinosaur Graveyard In Alberta To Be Preserved As Provincial Park

Famous bad lands of the Red Deer River valley, now regarded as the richest dinosaur graveyard in the Dominion, have been established as a provincial park, under terms of an order-in-council passed by the Alberta government.

The order-in-council prohibits the removal of any fossils from the protected area without a permit obtained from the provincial authorities.

The park area, according to the order, covers a stretch six miles long and two miles wide, along the banks of the Red Deer river.

The protected area has been the scene of many prospecting trips by fossil hunters during the recent years, during which many splendid specimens of pre-historic monsters have been obtained.

The park area, from the American Museum of Natural History, Smithsonian Institute, Canadian National Museum, and other sources, has obtained specimens from time to time.

## Lumber Mills Busy

Business In B.C. At Highest Peak In Ten Years

Savoullis at New Westminster, B.C., employing about 3,000 men, have been running day and night for some time attempting to fill orders, with business at the highest peak in ten years, lumbermen said. "Business has been so good it's almost embarrassing," one lumberman said. "Orders for export and for rail have been picked up in daily. There is a decided pickup for mining lumber. It is estimated that orders for at least 20,000,000 feet of lumber are now at hand," he said.

## Record Of Wars

Only eight per cent. of the time since history was first recorded has there been a world peace. In the last century, 3,521 years back and in that time there were only 268 years without hostilities. Furthermore, 8,000 treaties were made, but were observed only on an average of two years apiece. Accuracy of these statistics is not guaranteed, since there must have been many little wars which didn't get in the books.—The Nashville Tennessean.

## The Perfect Shopper

Indignant woman: "When I shop I always ask for what I want, and if they have it, and it pleases me, and I feel an inclination to buy it, and it is cheap enough, and I may be able to get it elsewhere, I don't buy it anywhere else, I nearly always buy it where the haggling and arguing during the whole day, which other persons do."

## GERMANY BEFORE AND AFTER THE WORLD WAR

These excellent maps show Germany before and after the World War. The Germany of to-day, however, is much larger, for Austria and Czechoslovakia are part of the German Reich now.

## Speed Of Planes

Physical Limits Believed To Be About 600 Miles Per Hour

A distinguished aeronautical engineer told the engineering section of the British Association for the Advancement of Science that the speed limit is nearing the practical limits of speed and that commercial aircraft virtually have reached them already.

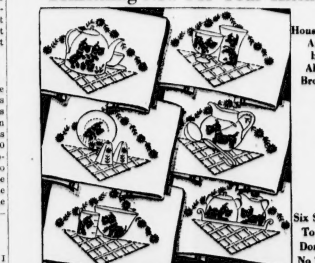

Dr. Harry E. Winpenny, former aeronautical advisor to the Australian government, declared the physical limits of airplane speed are in the neighborhood of 600 miles an hour and that for practical purposes commercial flying will settle down to speeds within the 200-300 mile range.

The approach to absolute speed limit and commercially feasible limit, he held, might simplify the hitherto insoluble problem of aerial disarmament since it would divide sharply the classes of military and civil craft where previously suspicion existed that a commercial machine was potentially a vehicle of offense.

Dr. Winpenny suggested that the present practical limit of aircraft engine horsepower is 30,000, a power sufficient to lift 250 tons, or a giant flying boat capable of carrying around 200 passengers. He mentioned that a flying boat of 3,120 tons had been forecast in the United States, he described the forecast as "bold," but added:

"Difficult as it may be to forecast accurately the future of the large flying boat, there can be little doubt that we shall soon see such craft in active competition with their oil rivals—while we see the surface of the sea—for all rapid passenger transport on the important Atlantic routes."

## Something New For Your Kitchen

PATTERN 6454

Everybody will welcome these scotties in their kitchen. A touch of black with color introduced in flowers and cross-hairs and you have a set of towels. Pattern 6454 contains a transfer pattern of six motifs arranged in a decorative manner. It is a most needed illustration of stitches; color schemes.

To obtain this pattern send 20 cents in coins (stamp cannot be accepted) to Household Department, Winning Newspaper Union, 175 McLeod Ave. E. Winnipeg.

There is no Alice Brooks pattern book published

# Medical Examinations For Recruits For Canadian Service To Be More Rigid

## Will Be Good Customer

Canada Would Do Well To Cultivate Air Customer

Canada has a new customer; he is the air tourist. His business will bear watching and may be cultivated with profit. There will be many of him in the near future.

Canada is ideally equipped by nature to attract the air tourist. The airplane is bringing unrivaled hunting and fishing grounds and beautiful woodland retreats invitingly within easy reach of the American tourist.

Introduction of the threeplane has brought flying within the range of the ordinary man's pocketbook. Average people in ever-increasing numbers are starting to fly for pleasure. We happen to know a man who learned to fly after he was 50. At 58 years of age he recently completed a tour of several thousand miles in his own light plane. He has a family of five, all of whom are licensed pilots.

One light plane factory in the United States reports that during the month of March of this year nearly twice as many of its airplanes were manufactured and sold as were built during April and a half year preceding 1920.

At the present time in the United States light planes are being built at the rate of more than 4,000 a year.

We quote George Westover, director of the Bureau of Civil Aeronautics in Washington, for the prediction that within five years the United States will have 100,000 pilots and 50,000 private airplanes. This is a conservative estimate.

The result of this whole new trend of mass flying, air travel by private plane for sheer pleasure, is that large numbers of pilots are banishing long distances for places to go. A great cavalcade of 500 planes from all parts of the states and even from Canada, gathered at Miami, Florida, last January, following the birds south in winter.

There is every reason to believe that great aerial migrations of tourists will likewise follow the birds north in summer, that the unspoiled natural playgrounds and beauty spots of Canada will be a major attraction for the air tourists. Let us be alert to the possibilities of this important development in the tourist industry.

Our new customer, the air tourist, is here; ours is the opportunity to offer him the very best of service. (Canadian Aviation Column).

## Getting Around

The Motor Car Does Not Give Us Time To Be Neighbourly

It is a sad fact that the automobile brings the far places near. But it seems that our fondness for the old bus threatens to make the new car a thing of the past. There are so many places we must go, so many places we want to go, so many places we cannot go, that we are forced to get a chance to cool off between trips. We really have not the time to be neighborly. If you must see your neighbor and you cannot reach him by telephone, you must call on him from his porch to the running board of his car. (Stratford Beacon-Herald).

## Fixed Things Up

But Clergyman's Wife Did Not Improve Much

The London Tatler tells this story. A clergyman and his wife were receiving a visit from a parishioner. The parishioner's small daughter, aged eight, walked up to the visitor and gazing intently at her, said:

"Oh, but aren't you plain?" Her mother was embarrassed and hurried. "Whatever do you mean?" she asked. "Apologies at once!"

"I only mean it for a joke," replied the child.

"Well," said her mother, hoping to smooth things over, "it would have been a much better joke if you had said, 'How pretty you are!'"

## Did Not Work Out

"Early to bed and early to rise," H. G. Jennings, Niagara Falls, Ont., has dropped.

He is early to deliver milk, and then faced prosecution for delivering milk before the hour set by civic law.

## The Average Beehive Contains

Between 50,000 and 75,000 workers, a few hundred drones, and one queen.

## It Is Thought That the glove industry

was established in Nîmes, France, in 1377.

## Medical examination of recruits for the Canadian Active Service Force will be "infinitely more thorough" than that of the Great War, H. C. Fooks, minister of pensions, said in a statement.

Major Fooks' recent assurance that the Great War veterans would exercise "a steady influence" on the young recruits now being recruited.

He expressed appreciation of "the fine spirit of loyalty which prompts veterans of the Great War to again offer their services to their country."

The minister said that war pensioners accepted for service would be regarded as in their persons. Those would be confined to them and to their dependents. Also, by an order-in-council made applicable, the provisions of the Pension Act had been already applied to "all those who enlist in the naval, military and air forces of Canada."

Major Fooks realized that many men in receipt of war veterans' allowances would find it difficult to qualify for service because of age and disability. Should any be accepted, however, the provisions of the War Veterans' Allowance Act would apply.

Married recipients of the allowances for active service, earn \$20 a year, and unmarried recipients \$10. The allowance granted by the act is \$10 a month for the former and \$20 for the latter.

While recognizing the fine spirit of loyalty which prompts veterans of the war to again offer their services, said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of national defense, that the interests of the veterans in service," said Mr. Fooks, "and in full realization of the steady influence which they have already exerted, and which they will continue to exert, we have upon their comrades, I am informed by the department of ## The World's Lighthouses

Earliest Known Was The Pharos Of Alexandria In 331 B.C.

Notice was taken of the fact that in 150 years since Congress passed an Act establishing the light-house service of the United States. In August 1789 there were only 15 lighthouses around the coast-line of the country, operated by the states, and these were transferred to the federal government. Now there are 19,000 of them on coasts, bays, rivers and harbors, aggregating 40,000 miles in length. Strange as it seems the largest in the United States is at Chicago, some 60 miles from the nearest seacoast. New York is the crown jewel.

Boston boasts the first lighthouse in North America and believes it was the first in the Western hemisphere. The light was established in 1681, 208 years ago, and "Boston Light" is famous in maritime annals. A new lighthouse was erected in 1715 at a cost of 1800 English pounds and it was said to be paid for by an assessment of one penny from every ton on vessels entering or leaving the port. Although the cost has long been liquidated the harbor board still imposes the tax. A few years later the lighthouse keeper obtained a "great gun" to warn ships of fog, which was replaced by the modern automatic fog signal. The earliest known lighthouse was the Pharos of Alexandria in 331 B.C. The Romans built many lighthouses and at Dover, England, there are still the remains of one of them. Marine authorities were also, however, to establish a regular system. At the beginning of the last century there were only 25 lighthouses and six floating lights around the British coast. Today, the waterways are studded with lighthouses, buoys and floating lights, and Canada has as fine a system as any.

Early lighthouses were illuminated by grates or chaffinches, which were of coal or wood, and a large light required as much as 400 tons of coal a year. Now, electric lights are operated electrically, and fog signals radiate 20 miles away are set going by the pressure of a button. Radio beams and other devices about ships have made navigation easy and safe, compared with the hazards of even the beginning of this century. —St. Thomas Times-Journal.

## In Spite Of Circumstances

There Are So Many Things Anybody Can Afford

There are many good things which we can all afford regardless of our circumstances.

We can all afford to give freely the best that we have, because in giving it we have it doubly.

We can well afford to do a seeming injustice, because God's law is sure.

We can well afford to be tolerant of the opinions of others, inasmuch as we are growing, our own views are certain to change.

We can well afford a seeming sacrifice for the right, because any other side is a losing one.

We can well afford any effort which aids to the betterment of the world, because any good from without can reach us only through an affinity with the good we have cultivated within.

We can well afford to be cheerful in apparent defeat, for we have not yet irreparably while we still have the spirit to cheer. —Benjamin Franklin.

## Varying Weights

Weight Of A Person On Earth And The Other Planets

If you would like to know what your weight would be on the various planets of the solar system, just step on the scales at the Franklin Institute in Philadelphia.

The weight machines have been especially constructed to show the variation in the weight of a person on the earth and the other planets.

For instance, a person here weighing 165 pounds would scale 2,916 pounds on the sun and only 1.6 pounds on the asteroid Ixus. Weights for the same person elsewhere would be: Moon, 17 pounds; Mars, 40, and Jupiter, 263.

## Stand Better Chance

Mr. and Mrs. C. R. Harsh report to the authorities at Red Bluff the latest development in the high-baiting racket. They gave a lift to what appeared to be two attractive young girls wearing slacks and sandals. They turned out to be two boys who explained they had adopted the disguise to get more sales.

Butterflies carry their tongues rolled like spring springs.

Most persons who are said to be acting the fool aren't acting.

## Statement Not Quite True

Possible For People To Miss What They Never Had

Miss Ethel Barrymore has expressed approval of the Little Theatre movement because, she says, it gave opportunities to young people who have never seen a stage performance.

There is a saying that "What you've never had you never miss." This is not quite true because there are many things people have never had that they would like to have. Since moving picture houses came to be established in cities, towns and even comparative villages some 25 years ago, a whole generation has grown up, millions of whom have never seen an acted comedy or drama. Except for the cinema clubs which make no tax either on the players' histrionic talents or the intelligence of the audience, an innumerable number of people have never seen a play unless they went to a large city on a visit. The little seed theatre was converted into a picture house or became a store, it seems difficult to realize what the younger generation has missed. People usually sit through a movie in strict silence. They seldom laugh loud and long because if they did they would miss what is coming because the players cannot pause; they dash about with their dialogue which, while it is fine, is never moved by the comedy or by the intensity of the drama or the sincerity of the acting, to the extent that the audience loses that human, personal factor which is so vital to give life and movement to a play. Shadowy figures move on and off the screen and no one can ever be stirred by their performance, to the extent that human beings, even to the extent of experiencing personal emotions.

Fortunately in recent years the Little Theatre movement has made tremendous strides in Canada. Many dramatics of young and old have seen good plays, well acted, and have been brought back to life. Nothing which has stimulated, fascinated and instructed people for millions of years. It would be a tremendous loss to humanity if the theatre should be eliminated from the realm of recreation. The Earl of Beeshorough was not one of the most successful or popular viceroys Canada ever had, but in an off-the-record sphere—the revival of the theatre—he performed a valuable service to the Dominion. —St. Thomas Times-Journal.

## Pleaty Of Confidence

Fresh From College Young Man Sought Excuse For Doing This

The New York Journal told this story:

The smiling, confident young man sought a large haiting house officer. He stopped up to the manager's desk.

"Good day, sir," he yelled. "Has your firm any aid for a highly intelligent college-trained man?"

The manager pointed a pencil over from.

"Your name?"

"Gradwell Lowesman," replied the philosopher.

"Experience?"

"Just out of college," admitted the lad.

"Well," mused the manager. "I want something in the executive line. A vice-president, for example."

The manager put down his pencil. "You really very sorry," he said, sarcastically, "but we already have 12 vice-presidents."

The young man waved a hand. Oh, that's all right," he stated, happily. "I'm not superstitious."

## New Type Of Blanket

Made Of Paper And Is Recommended For Cancer Use

Experimenters making new sources of supply of pulp wood should turn on all speed, as demands for that raw material are rising in many unexpected places, says the Cleveland Plain Dealer. One of the latest reported, which offers competition on the wood grower, is the paper blanket.

This is not the straw-paper blanket of Germany. It promises to be nothing other than what it is. A Defoliant house is beginning to market it, according to the Business Digest, which says it comes wrapped in the inevitable cellophane.

The manufacturer recommends it especially for use in camps and summer cottages and makes a point of its sanitary advantages in hospitals.

Navajo Indians do not take up their craft of silver working until about 1890.

Lemmon is called "lemon-squash" in England.

## AIR RAID SHELTERS FOR SENTRY AT ROYAL PALACES

Workmen erecting an air-raid shelter at Buckingham Palace for the sentry on guard at the main entrance to the palace. Similar shelters are being placed in front of every royal residence as war protection.

## A Tongue Twister

Name Of British Admiral Is Too Hints Regarding Improvements That Much To Handle

There cannot be many more tongue-twisting names in the personal books that of Admiral Sir Reginald Plunkett-Erle-Drax, who headed the British Military Mission to Moscow.

It is a name which caused as much difficulty to Russians as their names give us.

The Erle, Erle, and Drax were assumed in 1916 by direction of the will of the admiral's mother, Erle Lady Dunsany.

The admiral signs his letters "R.E.E.-Drax." In the Navy his pet name was "Old Plunk."

His favorite proverb is, "Fortune loves a daring soldier."

He is the only admiral in the Navy who possesses a pilot's certificate. This he obtained seven years ago. The tower of his country house, Chesham, Park, Wareham, Dorset, is 120 feet high, and is the structure immortalized in Hardy's "Two on a Tower."

## Piloted Light Plane

Mrs. A. S. Chavert, pilot of light airplanes, died recently in Sussex, England. In 1929 she took a light plane, still something of a novelty, to New York by ship and flew to Hollywood, Calif. Then, going by boat to Japan, she flew to Great Britain by way of Hankow, Hong Kong, Singapore and Egypt.

Nearly 20 years ago John Wesley left his favorite white cotton night cap in an inn at Newton Abbot, Devon. The innkeeper's family treasured it as an heirloom, but at length have sent it to the "Wesley museum."

Women in Paris, France, have a craze for big dogs.

Yarn produced by mills of Egypt last year yielded \$2,800,000 pounds.

## Cars Of The Future

Will Be More Than Simple Conveyances That May Come Soon

Considering the recently "pre-viewed" automobiles of 1949, it is evident that their designers will not find it difficult to profit by inspiration. Streamlining, for instance, we have heard the word when we talk of fountain pens, military or other vehicles. Yet there is not a single truly streamlined car on the market today, though the airplane makers passed the way over a quarter of a century ago.

Way is the engine still put in front, with a hood that obscures the road? And why are there running boards, when in a properly designed car it should be easy to step directly upon the floor? And doors. Open-side those of today and they are a menace in traffic. Obviously they ought to slide.

How many car owners use the more than ample luggage space provided in the rear as often as five times in a year? We want that space, now that cars are getting lower and lower, and we find it hard to cut and smoothen ourselves in entering and alighting. —New York Times.

## Helpful Information

"Guilty or not guilty?" asked the judge, scornfully of Bastian, charged with chicken stealing.

"Not guilty, Judge!"

"What is your alibi?"

"Alley by which?"

"You heard me. Have you an alibi?"

"You mean the alley by which Al got away, Judge?"

For the past 10 years, salmon fisheries in British Columbia have been patrolled by air from June to October.

In the Celebes there are cattle which grow no larger than domestic goats.

Dublin, Ireland, has an anti-gossip campaign.

## Rainy Season In India

This Is The Rainy Season In India, When The Monsoon Brings Dark Clouds And Heavy Rain Good For The Crops

One of the problems that confront people in rural Bengal is the danger from snakes. During this period snake-bite cases are of common occurrence, particularly in the eastern and northern districts of the province. Floods wash out the snakes' holes in jungles and gardens and the reptiles then take shelter in human habitations, particularly in cowsheds and kitchens. Instances are not rare of a housewife putting her hand into a cooking utensil and being bitten by a cobra lurking there without her knowledge.

During the season there is a great demand in the villages for the services of Badias (a nomad tribe) who are popularly believed to be able to cure snake bites by the recital of mantras (verses) and the use of charms. They move about in country boats from village to village.

Deserted German Ship

Because four Latvian members of the crew deserted at Sydney, N.S., "because they did not wish to fight for Germany," owners of the German freighter Helene lost a \$4,000 deposit. On arrival the ship must put up a \$10,000 bond for each alien aboard and on departure \$1,000 is forfeited for every alien aboard.

For lighting economy, keep electric bulbs clean. Wash with soap and water, but never immerse the metal screw neck, for when the bulb is replaced in the socket, a spark will result.

It is said that 27 singers are only twice as loud as one singer.

Dublin, Ireland, has an anti-gossip campaign.

## Much In Common

History Shows That Dictators Are Cut To One Pattern

Much of the popular antipathism caused by Stalin and Hitler's clasp of hands would cease if time were taken to give thought to the historical fact that all dictators are cut from the same piece of goods.

They differ in appearance. Some go in for uniforms, ceremonies, the artificial gestures. Others strive for simplicity. Some are arrogant and bullying in their methods. Others are suave. Some proclaim their quest for personal power. Others approach their objects under pretense of advancing favorites. In these differences they only reveal the diverse workings of their minds. The purpose all seek to achieve is the same—enslavement of the peoples over which they win authority.

To advance toward their goals all dictators must suppress every manifestation of love of freedom from their lands. In many cases this can be done by drill in the school of subjection. In others force is necessary to accomplish it. The history of every totalitarian state is a record of rigid regimentation of the minds of the people and ruthless persecution, even to death, of the occasional recalcitrant. Those who cannot be de-civilized by brute force or intimidated into conformity must be eliminated by imprisonment, by exile, by assassination or by other means.

Somewhere in his course each dictator encounters the same obstacles that his predecessors and contemporaries in dictatorship have encountered. If he has received himself into believing himself unique, the shock of this discovery is overwhelming, but the reaction is cut and dried.

He recognizes his kinship with all other dictators, the imperative necessity of their standing together. What then are the contradictions in the esteem of these men? Have raised? What value attaches to their proclaimed zeal for this or that cause? The essentials of the calling are bare. Self-preservation is not rare of its requirements. "Weedless and Tyevelom" is the motto that strike hands in their own defense. —New York Sun.

## New York's Fine Airport

Has Seven Hazards And Will Cost Forty Million Dollars

About 25 minutes by automobile from the roaring traffic of Manhattan Island, New York City is completing one of the world's finest airports in a wilderness of wind and water.

Between now and the fall the \$40,000,000 North Beach airport will become the terminus for arrivals from London, Marseilles, Los Angeles and Chicago. In each of the seven hangars on the airport's 500 acres a college football game could be played with room to spare.

The traffic control system is designed to handle 720 airplanes a day, and departures each 20 hours, exclusive of the flying boat schedules to Bermuda and Europe. That would add up to more than 1,500 passengers in and out each day with the airlines' present equipment—if traffic were kept at the present level.

To start with, the city expects that between 175 and 200 planes a day will land and take off.

## Deserved A Memorial

Monument Recalls First Shorthorn Cattle Sale In America

WPA workers have erected a monument near Chillicothe, Ohio, to a beefsteak, in a manner of speaking. An inscription recounts that the first public auction sale of Shorthorn cattle in America was held on the Felix Benick farm in 1836, purchased by 40 head bringing in an average of \$800 each. Imported from England, these were driven overland from Baltimore and sold to Scioto Valley farmers seeking to improve their beef herds. More than 600 Ohio breeders now raise Shorthorn cattle.

Three deaf Englishmen who met one day and engaged in conversation.

"Is this Wembley?" asked the first Englishman.

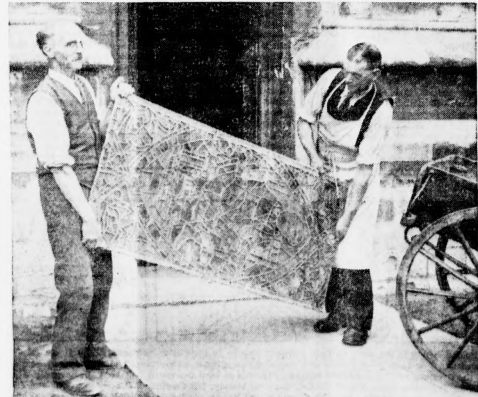

"No," said the second Englishman, "this is Thursday."

"So it is," said the third Englishman. "Let's have a Scotch and soda."

Jupiter is the largest of the planets with a diameter of 86,720 miles, which is about 11 times that of the earth. For every square mile of surface on our own earth, Jupiter has 120 square miles.

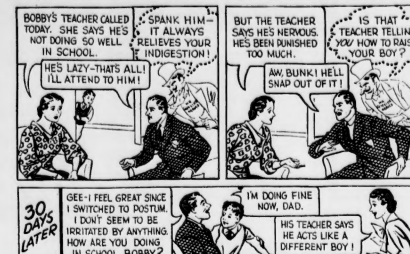

The first bale of cotton exported from the United States to Europe was shipped from Charleston, S.C., in 1784.

## STAINED GLASS REMOVED FROM ENGLISH CATHEDRALS AS WAR PRECAUTION

Two workmen removing precious 12th century stained glass from the great window in the south-west transept of Canterbury Cathedral are seen above carrying a section away to safety.

W. N. U. Service

## CHAPTER IV.—Continued

Deep in the night a 18-foot Peterson canoe slipped from the shadow-packed shore below the darkened buildings of the Hudson's Bay post, rode the ebb tide down to the river mouth, and turned north up the coast.

As the northwest wind drove the ice-pack toward the Cape of the Four Winds and the canoe raced the broken floes past its granite feet, the pursuing York boat appeared in the distance. It was a three days' race. But the frail canoe, driven by its desperate crew, reached White River, while high sail waited for a mud flat, the York boat dived for the next tide to float it free.

Neil Campbell, the trader, was puzzled and worried by Alan's strange request which, Alan assured him could not be explained until later. Yet he staunchly agreed to corroborate Alan's story.

### Delicious Recipe for Vanilla Cream Pudding

Vanilla Cream Pudding is a delicious dessert for all occasions. It is easy to make and can be served hot or cold. The recipe is as follows:

Combine 1/2 cups Durham Corn Starch very thoroughly with 1/2 cups granulated sugar and 1/2 teaspoon salt. Slowly stir in 3 cups hot milk; return to double boiler and stir and cook until mixture thickens. Cover and cook, with occasional stirring, until no raw flavor remains. Remove from heat and add 1/2 teaspoon vanilla. Cool thoroughly, then turn into wet molds or serving glasses. If chilled, this dessert may be unmolded. Serve cold with fruit (fresh, stewed or canned), or cream, as desired, accompanied by Blue Hives Golden Corn Syrup or cream, plain or whipped. For economical pudding, add shredded coconut to dessert and top with toasted coconut. Six servings.

Use level standard measurements.

Saves You Money!

all with McQueen. The Sergeant's sure, now you met this McCord and he's going back with you to the headwaters.

"You're a fool, Alan, to put yourself under suspicion of protecting a murderer," added Duncan McNab. "The police can make it hot for you—take you down to the railroad and put you on trial!"

Alan's good nature had returned. He smiled indulgently displaying his strong white teeth. "It's 100 miles to the headwaters. Not and I'll be glad to show the police the way. If that's all they want. Won't you, Noel?"

"Well, I wouldn't be in your shoes for a good deal," snipped Christie. By the by," he continued, after a period of silence, "a Canadian Algonquian plane came in a few days ago bringing that mail from Moose, and there's a passenger who is waiting in Nah, whose red face was widening in awe you." He winked at Duncan McNab.

"A passenger—to see me?" Alan stared at the speaker.

"Yes, a woman. She's thick with peace with the police. Has something to do with their trip here. I take it. But she won't talk to the other women about it. She's holding the plane until she says so."

On his way to Gabriel Desane's house, Alan stopped to see his friend Pierre and learn if the Desane were still at supper. Opening the door of the trade-room, to his surprise he saw Arlene Rivard in close conversation with a woman whose Norfolk jacket, short skirt and high laced boots marked her as a stranger at Fort George. As he entered he caught her remark:

"He must have met—"

"Hello, Rivard!" Alan, enjoying the embarrassment of the two.

"Pierre's over at his house, I suppose?"

"You're right," cried Alan. "That's a seaplane—one of the Canadian Airways. I'll bet! The Northern Trading Company, you know, found a lot of iron and copper on the Nattapoka. Gabriel says what they're after is gold, though."

At the Hudson's Bay Company, when Alan had looked rough and his stockies puppies in the small dog straddled behind his house, he was greeted by the sober faces of Duncan McNab and Andrew Christie, the factor.

"Well, young man," snapped Christie, "you seem to have made a fine mess of things!"

Alan stiffened as he met Christie's disgruntled look, alert to avoid being caught off his guard by what was coming.

"Why, I was thinking," parried Alan, keeping his temper, "that Noel and I had made a pretty good trip up the coast."

"Pretty good trip?" stormed the trader. "I'd say a pretty bad trip for you, Alan Cameron. Why, your father's turn over in his grave if he knew what you'd been up to!"

"Blood darkened Alan's wind-blurred face as he smiled as he replied. "When you see the three pups I got at the Nattapoka you'll agree—"

Your starting north the night after I told you the police had reached a York boat proves you wanted to see me before the police reached him."

Alan's face went white again. "Well, he told them where I got that money, didn't he?"

"Yes, but the police don't believe him."

"You you?" demanded Cameron, a glimmer in his gray eyes.

"I've got to believe Neil Campbell, I suppose, but he didn't help you at

"Why, 'allo, Cameron!" The tone of the clerk was very cordial as he left the woman, who leaned gracefully against the trade-counter calmly inspecting the handsome young voyageur, from his moccasins to the deepest twinkling gray eyes.

"Mrs. Hanbury, I would make you acquainted with Alan Cameron," said the clerk turning to the woman.

"So this is the woman who has upset Fort George," he thought. She seemed hardly more than 35, with a tall, graceful figure set off by the whipcord suit. Her face, framed by wavy bronze hair, was the face of a girl, except for the hazel eyes, long lashed and large. The eyes were unmistakably those of a woman who had seen much.

"May I speak to Mr. Cameron alone?" she asked of Rivard.

"Certainly, Madame," replied the clerk with an insinuating smile as he left the trade-room.

Mrs. Hanbury lost no time in coming to the point.

"Mr. Cameron, are you out of your mind?"

Alan laughed. Fiddling his moccasins against his chest he calmly met the handsome eye that searched his.

"I may be, I never had much mind," he answered, dryly.

"You're playing a dangerous game," she became suddenly dramatic, "and you'll end up in jail against the Provincial Police."

He had once read of a woman detective in a book in the post library. Could this woman be a government detective?

"How else I worked against the police," he asked, disarmingly, "by telling the truth?"

She burst into a paroxysm of laughter that did not fail to display the whiteness and regularity of her teeth. Drying her eyes with a handkerchief that filled the air with a subtle perfume, she said, standing very close to the uncomfortable Alan.

"Excuse me, Mrs. Hanbury, I don't know who you are, but the black darkening his bronzed face. "What right have you to ask me questions?"

She opened her large eyes with their long-lashed lids in amazement. "They didn't tell you at the Hudson's Bay?"

"Not a word—except that you were here and wanted to see me."

"That's strange! In company with the government, you know—special agent. I flew to Moose on another matter and wanted to have a look at the East Coast. Knowing Sergeant McQueen and Corporal Slade of course I was interested in their search for this McCord when you met in the interior last winter."

"I believe you have CAFFEINE-NERVES. YOU'RE SO CROSS AND IRRITABLE. WHY DON'T YOU PLEASE QUIT TEA AND COFFEE FOR 30 DAYS AND DRINK POSTUM INSTEAD!"

"I don't know what to think. Good night, Alan!" And she left the room.

Discovery Of Rare Importance Is Made In England

The full story of what is now shown to be the greatest archaeological discovery of recent times has been revealed in a typewritten statement issued in the peaceful Suffolk town of Woodbridge.

It describes in detail the treasures—objects of gold and silver, many studded with diamonds and other precious stones—found in the 1,600-year-old royal "funeral-ship" buried on a hilltop at Sutton Hoo, near Woodbridge.

The statement is drawn up by C. W. Phillips, a Fellow of Selwyn College, Cambridge, who has been supervising the excavations for the Office of Works in London.

He emphasizes that the highest importance is attached to the discovery because this is the first time any ship burial, found in other Britain and Scandinavia, had not been plundered.

They mark a discovery far more important than the riches of the Anglo-Saxons. It is possible that the hopes of the archaeologists and scientists who have been eagerly awaiting news of the find, it is stated.

They have brought across the centuries a wealth of well-preserved Anglo-Saxon relics, including a sword, such as probably has been equaled only by the tomb of King Tut-Ankh Amen in Egypt.

The statement is drawn up by C. W. Phillips, a Fellow of Selwyn College, Cambridge, who has been supervising the excavations for the Office of Works in London.

He emphasizes that the highest importance is attached to the discovery because this is the first time any ship burial, found in other Britain and Scandinavia, had not been plundered.

These riches of Anglo-Saxon England uncovered by the excavations in the church, chain mail, jewels and clothing.

## BETHEL BAPTIST CHURCH

REV. R. MILBRANDT, Pastor

Services for Sunday, September 17

11 a.m.—Morning Service.

7:30 p.m.—Evening Service.

All people are invited to enjoy the

ministry of God's word.

"When angry, count ten before speak-

ing. When very angry, count one

hundred and then don't speak."

The big dinner was over and the

time for speeches had arrived. "Ladies

and gentlemen," announced the toast-

master, introducing the visiting cele-

brity of the evening, "you have thus

far been giving your attention to a

lurky stuffed with sage. You will now

kindly give your attention to a sage

stuffed with turkey."

## Snicklefritz----

Pa, what is a publicity hound?  
One with a big mouth and a long  
tail.

"May I use your telephone?"  
"Certainly! Is yours out of order?"  
"Not exactly, but sister is using it to  
hold up the window, ma's cutting  
cookies with the mouthpiece and baby  
is treading on the cord."

Money is an article which may be  
used as a universal passport to every-  
thing except Heaven, and as a univer-  
sal passport of everything except hap-  
piness.

A Russian was being led off to  
execution by a squad of Bolshevik sol-  
diers one rainy morning.

"What brings you Bolsheviks here,"  
murmured the doomed one, "to march  
me through a rain like this?"

"How about us?" retorted one of  
the squad. "We have to march back."

An old Scotsman was smoking in  
the waiting room of a railway station.

A porter said to him: "Don't you see  
that notice on the wall, 'No Smoking  
Allowed'?"

"Yes, I do," said the Scot, "but how  
can I keep all your rules? There's  
another on the wall, 'Wear Janella  
Corsets!'"

In a small village in Ireland the  
mother of a soldier met the village  
priest. Tears were streaming down her  
cheeks and he asked what was the  
matter.

"Faith, yer Riverine," she said,  
"Pat has been killed."

"Oh, I am very sorry," he said. "Did  
you receive word from the war office?"

"Indeed an' O' didn't," said Mrs.  
Murphy. "O' got word from himself."

The priest looked very puzzled and  
said: "But how can that be?"

"Sure," she said, "and here is the  
letter; read it for yourself."

The letter said: "Dear Mother—I  
am now in the Holy Land—and it's  
d—hot."

I've  
**DISCOVERED  
NEW WAYS  
OF SERVING  
Fish**

### FISH SALAD

Any canned or cooked fish may be  
used. Combine with salad picked  
up and cold dress. Pour over  
Cottolene with sliced or stuffed car-  
rots and onion. Serve with mayon-  
naise.

### BAKED FISH CAKES

2 pounds fish steaks  
2 pounds onion  
2 cups of potato soup  
2 cups of milk  
Wipe the slices of fish with  
butter and salt. Mix together  
around the fish, onion, potato  
soup and milk. Bake in moder-

### BROILED FISH

Clean fish using whole fish  
and salt. Rub with oil  
and lemon juice. If fish is  
not too large, broil on a spit  
over a charcoal fire. Place on  
a serving dish when done. If  
very large, broil in a pan. If  
average fish should cook in 10  
minutes.

No matter where you live in Canada, there  
is always a variety of fish available to you,  
either fresh, frozen, smoked, dried, canned or  
pickled.

Your family will enjoy FISH. It can be  
served in an infinite number of delicious  
ways. Send for the FREE recipe booklet  
today.

Any Day A FISH DAY

## DEEP-ROOTED IN FRIENDLY SOIL!

A great tree gains its stature, builds its strength and  
bears its fruit through years of growth in friendly  
ground. So do the enterprises of man.

Like the great tree, the co-operative ideal has taken deep root  
in Alberta soil and is growing stronger each year.

Alberta Pool Elevators has risen to a position of predominance  
because of its adherence to the co-operative ideology, its  
alertness and energy in advancing farm interests, and its open  
policy of doing business.

The co-operative way of grain marketing is the correct way,  
the system is essentially sound and it should be extended and  
strengthened.

Farmers can gain power, prestige and added security only by  
developing their own co-operative businesses.

Alberta Pool Elevators is a purely Alberta Farmer-owned co-  
operative.

Your patronage is respectfully solicited.
